SUMMARY

a recent Computer Science graduate from October 6 University with a strong passion for Front-End Development. I enjoy creating responsive, user-friendly, and visually appealing web applications while continuously improving my skills and learning modern technologies. I am eager to contribute to real-world projects, grow as a developer, and build digital experiences that make a positive impact.

WORK EXPERIENCE

Tareeqy

- **Tareeqy** is my graduation project, designed to help users easily find the transportation routes they need for their destinations. I contributed to the logo and overall UI design and developed key features including authentication, search history, sign language search, and the admin dashboard. The project was built with a focus on accessibility and usability to serve a wide range of users and make transportation information easier to access.

Fresh Cart

- **Fresh Cart** is my final React project, built using the Route API. Through this project, I applied the main React concepts I learned, including components, hooks, routing, state management, API integration, authentication, and responsive design, to create a functional and user-friendly e-commerce application.

Novelset

- **NovelSet** is a personal project created to improve my front-end development skills. It showcases classic novels using an external API, and I also designed the UI and logo myself to enhance both my development and design abilities while building a clean and engaging user experience.

Weather-app

- **Weather App** is a practice project I built during my Route training to strengthen my skills in working with APIs. It allows users to search for any location and view real-time weather information through a clean and responsive interface, helping me gain hands-on experience with API integration and React development.

VEZEETA

- **Vezeeta Clone** is a practice project developed during my NTI training as a simulation of the popular Vezeeta platform. It was built to strengthen my front-end development skills by recreating a real-world medical booking interface with a responsive design and user-friendly experience.

EDUCATION

Bachelor degree in computer science

October 6 University

2022 – 2026

Front-end development diploma

ROUTE academy

09/2024 – 02/2025

Full Stack Web Development using PHP (Summer Training)

NTI

17/08/2025 – 11/09/2025

HUAWEI AI summer training

October 6 University

10/2025 – 11/2025

Digital Egypt Pioneers Initiative (DEPI) scholarship in Front-End Development

10/2025 – 07/2026

ADDITIONAL INFORMATION

Technical Skills

HTML5, CSS, JS, GIT, Bootstrap, Tailwind, J Query, React.js, Next.js, Redux, ES6, AJAX, SASS, Typescript ,React Query

Languages

Arabic, English
