

MENNATULLAH AHMED EZZAT

React Front-end Developer

mennatullahahmed2004@gmail.com | 01115471752 | Giza | linkedin.com/in/mennatullah-ahmed-6b798b353 | github.com/m22nna

SUMMARY

Fresh Computer Science graduate specializing in Front-End Development with a strong focus on React. Skilled in building responsive and user-friendly web applications using React, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, and modern front-end tools. Continuously expanding my technical skills by learning Back-End development and exploring technologies such as Node.js and Express. Passionate about learning, improving my skills, and working on real-world projects. Currently seeking a Junior Front-End Developer opportunity where I can contribute to a professional team, gain hands-on experience, and grow as a developer.

EDUCATION

Bachelor of Computer Science, *October 6 University* 10/2022 – 07/2026 | Egypt
• **Major:** Computer Science **GPA:** 3.35 / 4.00
• **Graduation Project:** *Tareeqy* [↗](#) **Grade:** Excellent

EXPERIENCE

Diploma, *ROUTE academy* 09/2024 – 02/2025
Completed a 6-month intensive diploma covering comprehensive Front-End development skills, including React.js and modern web technologies. Gained hands-on experience through real-world projects and practical training.

Scholarship, *DEPI* 10/2025 – 07/2026
Completed a 6-month intensive training covering Front-End development, React.js, and introductory Back-End development with Node.js. Developed and delivered a graduation project as part of the program.

Summer Training, *NTI* 17/08/2025 – 11/09/2025
Gained hands-on experience in Front-End development using HTML, CSS, JavaScript, and modern web technologies. Also learned PHP fundamentals and progressed to working with PHP frameworks.

Summer training, *October 6 University* 10/2025 – 11/2025
Gained foundational knowledge of Artificial Intelligence and its core concepts through practical university training.

Training, *SpaceTech* 07/2026 – Present
Currently developing advanced Front-End skills while gaining practical exposure to project management, team workflows, and how software projects are organized and managed in a professional environment.

TECHNICAL SKILLS

Languages	Frameworks & Libraries	UI & Styling	Tools
• HTML5	React.js	Tailwind	Git
• CSS3	Next.js	Radix UI	GitHub
• JavaScript (ES6+)	Redux	Bootstrap	Vite
• TypeScript	React Query	Material UI (MUI)	Postman
• Sass	jQuery	shadcn/ui	Vercel
• Regex	Framer Motion	Flowbite React	Claude

PROJECTS

Tareeqy
• **Tareeqy** is my graduation project, designed to help users easily find the transportation routes they need for their destinations. I contributed to the logo and overall UI design and developed key features including authentication, search history, sign language search, and the admin dashboard. The project was built with a focus on accessibility and usability to serve a wide range of users and make transportation information easier to access.

Fresh Cart
• **Fresh Cart** is my final React project, built using the Route API. Through this project, I applied the main React concepts I learned, including components, hooks, routing, state management, API integration, authentication, and responsive design, to create a functional and user-friendly e-commerce application.
• [fresh-cart-theta-self.vercel.app](#) [↗](#)

Novelset
• **NovelSet** is a personal project created to improve my front-end development skills. It showcases classic novels using an external API, and I also designed the UI and logo myself to enhance both my development and design abilities while building a clean and engaging user experience.
• [novelset.vercel.app](#) [↗](#)

IFIX— Home Repair Services Platform
• Developed a service platform for booking home repair services such as electrical, plumbing, carpentry, and painting. Implemented AI-powered voice input to generate a service report for technicians, along with online payment functionality and a user-friendly responsive interface.
• [front-end-2avb.vercel.app](#) [↗](#)

PortfolioGenie— AI-Powered Portfolio Generator
• Developed an AI-powered platform that generates personalized portfolios based on user-provided information. Contributed to both Front-End and Back-End development, integrated the GitHub API to fetch user data and projects, and implemented AI-driven portfolio generation.

VEZEETA

- **Vezeeta Clone** is a practice project developed during my NTI training as a simulation of the popular Vezeeta platform. It was built to strengthen my front-end development skills by recreating a real-world medical booking interface with a responsive design and user-friendly experience.
